DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 - 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Vester et al. (USPN 5,287,853 - cited by Applicant). Vester et al. teach an adapter/cable (or sensor in combination with the adapter, which is considered to meet the arrangement of claims 2 and 7) that provides information to an oximeter monitor. The combination of resistors R3 and R7 is an information generator that alters the signal from resistor R2 so that the oximeter monitor receives recognizable data related to the sensor type and wavelength. Further, signal line L8 with node N1 are common to all signal paths involved in the drive signal, the detector signal, and the information signal.
